Steelcase powered by VergeSense

BETTER TOGETHER

VergeSense and Steelcase partner to enable data-driven decisions that allow organizations to experiment, plan, and determine with confidence what their workspace needs.

The **VergeSense Occupancy Intelligence Platform** with consulting services from Steelcase provide the insights needed to ideate, experiment, and validate that your workspace is cost-optimized, sustainable, and delivers productive experiences for employees.

Through collaboration, you can perform demand planning to meet space demand and staff growth using data-driven planning for space allocation, reassignment, seat ratio calculations, and space demand forecasting.

How it works

CAPTURE

Area sensors are used to accurately capture granular usage spaces. They're ceiling mounted and cover a wide area office floor, measuring the person count, active and passive occupancy of the spaces in that area. The data is then processed and reported at the space level.

ANALYZE

VergeSense AI continuously analyzes data to generate a true understanding of people count at scale across spaces and how their actually being used: How many people are using certain buildings, floors, and spaces, how they're using them, and the times, days and frequency of each.

OPTIMIZE

VergeSense Cloud Portal synthesizes behavioral data into high-impact, actionable insights that are accessible through use case specific dashboards or open API. Integrate VergeSense occupancy data with 3rd party workplace applications to enable and orchestrate critical workflows.

Solve for space design and planning with occupancy intelligence

PROBLEMS WE SOLVE

Key benefits

- Intentionally designed spaces
- A clear understanding of what's happening in spaces
- Get up and running quickly to start collecting data
- Spending less time parsing through data and more time making decisions

The VergeSense Occupancy Intelligence Platform

CONFIDENCE

In an era of inconsistent and unpredictable occupancy, VergeSense allows you to confidently make fact-based portfolio and space decisions that enable significant cost savings and a better employee experience.

The cost of making decisions on incomplete and low-fidelity workplace data has become too great. As organizational needs change, VergeSense enables you to make precise decisions to optimize your overall office footprint, reduce costs, and improve employee experience with confidence.

AGILITY

Get up and running quickly so you can optimize when you're ready.

Even though VergeSense is a sophisticated and complex platform, its installation and use are not. Significant investments have been made in making it flexible so you can get started fast and make decisions even faster.

PEACE OF MIND

We take your privacy, security, and scalability needs seriously. Our solution is 100% anonymous, SOC2 and ISO 27001 certified, and GDPR compliant

In today's constantly changing world of workspace management, you need a partner with expertise who understands your business while putting privacy and security at the center of all they do. VergeSense combines deep workplace expertise with an industry-leading privacy and security model.

Create intentional **workplace experiences** through data-driven decisions

VergeSense is the company behind the Occupancy Intelligence Platform. Over 160 companies across 43 countries rely on VergeSense for a true understanding of how their portfolios and spaces are actually used so you don't have to compromise between reducing cost and improving employee experience.

www.vergesense.com

Steelcase leads the way in creating great experiences by offering a range of architecture, furniture and technology products and services designed to help people reach their full potential. Together with partners, Steelcase designs spaces to help people work, learn and heal.
